

# New Flood Proof Pump Stations

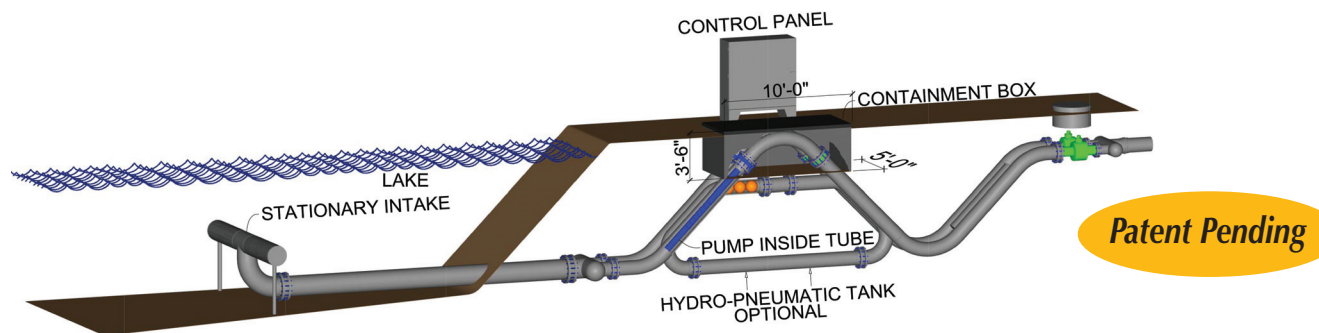

These underwater and in-ground pump stations are installed with the control panels anywhere above flood stage. Our systems are able to float at different depths to enable you to draw the best water, with less use of chemicals, and can be remotely controlled from any location.

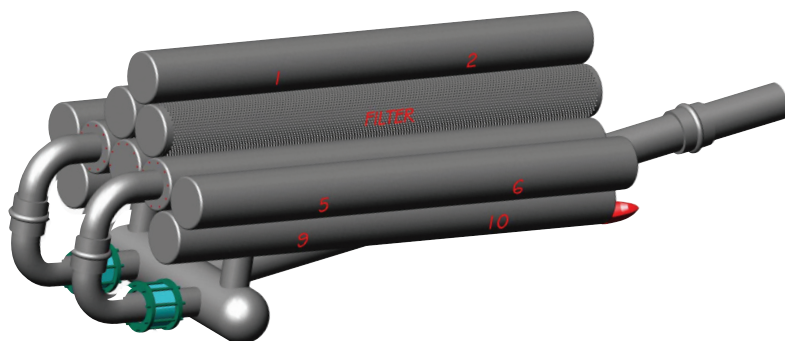

Remote or Auto Adjustable Intake on Long Reach Intake to In-Ground Wet Well, No Building Required

Eliminate Large Easements and Buildings with their Associated Heating and Maintenance Costs

Stationary High Volume 22,000 GPM Single Intake to In-Ground Wet Well, No Building Required

Multi-Submersible and Adjustable Depth, 6,000 GPM, No Building Required
